

The FAA Safety Team presents:

Preparing For Takeoff

At this interesting Safety Seminar we will start out with a discussion led by Designated Pilot Examiner and FAASTeam Rep Mike Brubaker on the importance of understanding the factors related to a successful takeoff. From performance planning to emergency situations and power-on/departure stalls, we'll cover the items that all pilots should consider before their next take off. We'll also go over the items pilot's should consider and include in developing a good departure briefing, as referenced in the new Airman Certification Standards. FAASTeam Program Manager Bill VanArtsdalen will then finish with a review of some of the causal factors contributing to accidents in the local area during FY 2016. Register for this event today!!

Directions: Please see map link for directions, seminar will be in hangar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
